OBJECTIVE

Motivated Diploma in Computer Science student seeking a Junior Full Stack Developer position at Kaytumadi iSolution. Experienced in building database-driven web applications with HTML, CSS, JavaScript, PHP and MySQL, and in developing an Android app with a PHP/MySQL backend. Skilled in UI/UX design with Figma, with a strong willingness to learn, solve problems, and contribute to a development team.

PROJECT EXPERIENCE

FlexiWork – Part-time Job Web System
Technologies: HTML, CSS, JavaScript, PHP, MySQL
- Built a full stack web platform for students to search, save, and apply for part-time jobs.
- Designed front-end interfaces for job seekers, employers, and system administrators.
- Implemented job posting and application management features with a PHP and MySQL backend.

FoodFusion – Recipe & Community Web System
Technologies: PHP, MySQL, HTML, CSS, JavaScript
- Developed a web platform for browsing and sharing recipes.
- Implemented features for liking, commenting on, and managing recipes.
- Created user-friendly interfaces and database-driven functionality using web technologies.

FitForge – Fitness Tracking Mobile App
Technologies: Kotlin, Android Studio, PHP, MySQL, Google Maps API, Figma
- Developed an Android fitness app supporting running, cycling, weightlifting, and badminton.
- Implemented workout logging, fitness goals, progress tracking, and Google Maps route tracking.
- Integrated a PHP/MySQL backend to manage user accounts and workout data.

Fitness Maniac – Fitness Booking & E-commerce UI/UX Design
Tool: Figma
- Designed a fitness platform combining trainer booking and fitness accessory shopping.
- Created user interfaces focused on intuitive navigation and user-friendly interactions.
- Organized and refined UI/UX layouts using Figma.
